## EDUCATION

---

**University of California, Los Angeles (UCLA)**

*Bachelor of Science, Cognitive Science w/ Specialization in Computer Science | GPA 3.86*

**Graduation Date: June 2022**

*Los Angeles, CA*

## EXPERIENCE

---

### Covalent

**October 2020 – Present**

*Engineering Manager*

*Los Angeles, CA*

- Manage development of web app built with Next.js and GraphQL designed to connect peers and teammates through interactive ice breaker games to enhance productivity and virtual workplace bonding.
- Guide developers towards efficient implementations of application UI and API endpoints to create a seamless and fast user experience.
- Collaborate with product manager to discuss project timelines and weekly action plans to ensure technical tasks are finished by deployment deadlines.

### Dirtybird Records

**February 2020 – June 2020**

*Marketing & Software Intern*

*Thousand Oaks, CA*

- Developed software and marketing campaigns for an electronic house music label, leading to increased efficiency in business operations as well as fan outreach.
- Wrote lightweight software with Python and Dropbox API that synced song submissions from company website to Dirtybird's Dropbox account, streamlining the process of screening demos and audio data management, resulting in a more accessible decision-making process for the A&R team.
- Analyzed various social media/digital streaming data metrics with Python to produce reports for targeted marketing campaigns for upcoming music releases, setting a data-driven approach for future PR campaigns.

### Super Tutor TV

**May 2018 – September 2018**

*Full-Stack Web Development Intern*

*Los Angeles, CA*

- Curated curriculum and developed web content for an ed-tech startup that provided an online resource for high school students to achieve higher standardized test scores and plan their college careers via online tutoring.
- Implemented front-end interface of an online tutoring web application with HTML/CSS/JavaScript and also maintained company website's blog posts, pages, and site data via WordPress and MySQL.
- Imported curriculum assets and large amounts of standardized testing practice questions into backend database, creating an efficient system for company's web application to access practice questions dynamically.

## PROJECTS

[github.com/leedanny112358](https://github.com/leedanny112358)

---

### Eggboard

**October 2020**

- A forum-like platform for students to share their project ideas and find others to work with, heavily inspired to facilitate easier group project formation in UCLA computer science courses.

### YourMusicTasteIsTrash

**September 2020**

- A music discovery web application built with React and Spotify Web API to produce new playlists, with lesser known and obscure artists, based on a user's pre-existing playlist.

### TikTokScraper

**March 2020**

- A python web scraper incorporating Selenium and BeautifulSoup4 that scrapes Tik Tok hashtags for content creator info to aid music labels and brands in planning their influencer marketing campaigns.
